Office Action Summary	Application No. 10/581,746	Applicant(s) GUILLOIS ET AL.	
	Examiner Korie H. Chan	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For example, claim 1, the metes and bounds of the claims are unclear as it is not clear whether or not the support device is claimed with the aircraft engine, thrust reverser, fire-detection component, etc... Examiner as best understood treated the claim as claiming the support device only. Further the term "it" found throughout the claims is vague and indefinite as to what "it" is referring to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3632

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyamoto et al (US patent no. 6,668,865). Miyamoto discloses a support device (figure 5) comprising the means of support comprises two holding members (37) each made in the form of a half-cylindrical body (37); wherein each body (37) has a flat face provided with at least one longitudinal furrow (38) in which a fire-detection capillary can be placed; wherein each body has a side wall in which longitudinal recesses (recesses between 37a) are formed; wherein each longitudinal recess is enclosed by two end shoulders (37a); wherein it comprises at least two metal shells (26a) that can be arranged around the holding members (37); wherein each shell is made in the form of a part capable of fitting around part of the exterior of the holding members; clip holder (24 and 25, 35, 36) being positioned around the shells (26a).

Claims 1 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Giebel et al (US patent no. 4,117,259). Giebel discloses a support device comprising the means of support comprises two holding members (15); a spring clip (17) in which the holding members are engaged.

Claims 9 , 11, and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art of record demonstrate support device with means of support being two holding members.
